Adrish Dey

Mail: Available on Request

Email: adrishd.cse2017@nsec.ac.in
Web: captainpool.me

Research Interests

Geometric and Topological Deep Learning, Riemannian Optimization, Geometric Statistics, Optimal Transport, Topological Data Analysis, Generative Models.

Education

Netaji Subhash Engineering College – ***GPA 8.1 / 10.0*** 07/2017 - 07/2021
Affiliation of Maulana Abul Kalam Azad University of Technology, West Bengal
Bachelor of Technology (B.Tech) in Computer Science and Engineering.

Publication

Topo Sampler: A Topology Constrained Noise Sampling for GANs
Adrish Dey[*] and Sayantan Das[*]
Neural Information Processing Systems (NeurIPS) 2020 – Workshop on Topological Data Analysis and Beyond. **Spotlight Presentation**.

Preprint

Riemannian Functional Map Synchronization for Probabilistic Partial Correspondence in Shape Networks
Faria Huq, **Adrish Dey**, Sahra Yusuf, Dena Bazazian, Tolga Birdal and Nina Miolane
ArXiv: 2111.14762 [cs.CV, cs.GR]

Ongoing Projects

Bayesian Rotation Synchronization
Adrish Dey, Dorothy Najjuma Kamya, David Palmer and Justin Solomon
Tentative Venue: International Conference on Machine Learning (ICML) 2022

Diffusion Learning in Simplicial Message Passing Neural Networks
Adrish Dey and Bastian Alexander Rieck

Experiences

Weights & Biases 11/2021 - present
Machine Learning Engineer – Growth Team

Massachusetts Institute of Technology 07/2021 - 08/2021
Summer Geometry Institute (SGI) Research Fellow

1. Implemented an OpenFlipper extension for optimizing folded-over quad-meshes via locally injective maps (with Prof. David Bommes, University of Bern)
2. Explored continuous label switching in Bayesian Rotation Synchronization Problem (with David R. Palmer, MIT)
3. Implemented proof-of-concept experiments for a novel Riemannian gradient descent based approach to alleviate continuous label switching (with David R. Palmer, MIT) [Link to Research Blog]
4. Exploring Anisotropic Schrödinger Bridges on discrete manifolds. (with Prof. Justin Solomon, MIT)

Bachelor's Thesis 04/2021 - 07/2021
Title: "Discrete Non-Euclidean Convolutions: Signal Processing and Random Walk on Simplicial Complexes"
Advisors: Dr. Bastian Alexander Rieck (ETH Zürich, currently Technische Universität

München, Germany); Prof. Silpi Bose (Netaji Subhash Engineering College, Kolkata)
Contributions: Explored a novel diffusion learning method for simplicial message passing neural networks.

Independent Research 08/2020 - 10/2020
Mentored By: Dr. Bastian Alexander Rieck, ETH Zürich

1. Studied Disconnected Manifold Learning in GANs, using Persistent Homology.
2. Implemented Experiments and co-authored a NeurIPS Workshop Submission. [Link to Report]

Opaltech.ai 05/2020 - 08/2020
Research Engineering Intern

1. Explored and Implemented a RGBD SLAM based 3D Scene Reconstruction Framework with Dr. Shahrouz Ryan Alimo, NASA Jet Propulsion Lab
2. Implemented a Raytracing based Simulator for synthetic data generation

Rephrase.ai 12/2019 - 02/2020
Research Intern

1. Designed a data pre-processing unit, for stream lining audio-splitting / filter-bank generation.
2. Explored and implemented a sparsity-optimized version of a hessian-free second-order optimizer.
3. Contributed to Generative Adversarial Network (GAN) driven domain translation of face expressions.

Google 05/2019 - 08/2019
Google Summer of Code Student – TensorFlow

1. Implemented Enhanced Super Resolution Generative Adversarial Network (ESRGAN) and published the trained model to TensorFlow Hub.
   [Link to Github]
   [Link to Pretrained Model] ($2K+$ **downloads**)
2. Implemented GAN Distillation Framework for ESRGAN generator. Achieved $\sim$ **628x compression factor** with minimal drop in reconstruction quality. Capable of running **near-real-time** video frame super resolution on Pixel 3 CPU. [Link to Github]
3. Added Support for displaying AutoGraphed tf.functions, with TensorFlow `saved_model_cli`. [Link to Github]

Open Source Contributions

Geomstats, TensorFlow Datasets, TensorFlow Hub, TensorFlow

Service

[2021 - 2021] Reviewer – ICLR 2021 Workshop on Geometrical and Topological Representation Learning.

[2019 - 2020] Founder and President – Open Source Club and Linux User Group at Netaji Subhash Engineering College

[2018 - 2020] Technical Lead – Entrepreneurship and Development Cell at Netaji Subhash Engineering College (Funded by Ministry of Human Resources and Development, Government of India)

Hackathons and Competitions

2021 Stanford TreeHacks [Link To Devpost]
2020 COVID-19 Automation Anywhere Botathon [Link To Devpost]
2020 1789 out of 10724 global rank – Google HashCode 2020
2020 Special Mention – Techno India Group CodeTigers DECOV 2020 COVID-19 Hackathon
2019 2958 out of 6640 global rank – Google HashCode 2019
2019 2nd position. – Institutional Hackathon @ Calcutta Institute of Engineering and Management [Link to Repository]
2019 Top 10 – HackInTheNorth; Institutional Hackathon @ IIIT Allahabad [Link to DevFolio]
2018 2nd position – NASA SpaceApps Challenge Zonals
2018 Shortlisted for Finals – ACM Kolkata B.Tech Project Award [Link to Website]
